Performance snapshot

July 2026 — the active search campaign (R2R | Search). A record month for leads, and cost per lead came down while volume went up.

The headline: **we spent 43% more and got 75% more leads.** That's the definition of a campaign scaling properly — extra budget went in and came back out cheaper, not dearer. One in three clicks now becomes an enquiry.

Month-on-month breakdown

April's high impressions came from a Performance Max campaign since paused. We tightened the account to focused search — fewer impressions, but the right people clicking and converting. July is the first month we've pushed budget back up, and the account held its efficiency.

METRIC	APR	MAY	JUN	JUL
Impressions	66,319	12,907	2,074	2,371
Clicks	386	339	132	147
Conversions	17	25	28	49
Conversion rate	4.4%	7.4%	21.2%	33.3%
CTR	0.58%	2.63%	6.36%	6.20%
Avg. CPC	\$4.03	\$3.20	\$11.57	\$14.86
Cost	\$1,553.92	\$1,083.59	\$1,527.69	\$2,184.32
Cost / conversion	\$91.41	\$43.34	\$54.56	\$44.58

June figures are final month-end numbers and differ marginally from last month's report, which was produced on 30 June before the month closed.

Trends & charts

The shape of the story: leads climbing hard, engagement holding, cost per lead back near its best.

Conversions per month

Leads have grown every month — 17 → 25 → 28 → 49. July alone is nearly triple April.

Click-through rate (%)

Up 11× since April and holding steady through the July scale-up.

Cost per conversion (\$)

Down from \$91 to \$44.58 — within a dollar of May's best, on double the lead volume.

Keywords doing the heavy lifting 🏆

The clearest signal in the account this month: **local town names win**. Terms naming a specific suburb or the Yarra Valley delivered leads at less than half the cost of broad metro terms.

Local town & Yarra Valley terms

\$26.03

per lead · 23 leads from \$598 spend

Broad "melbourne / near me" terms

\$57.17

per lead · 26 leads from \$1,486 spend

Both halves deliver roughly the same number of leads — but the metro half costs **2.5× more** to get them. That's where the opportunity sits.

KEYWORD	MATCH	QS	CONV	COST	COST / LEAD	CTR
towing service melbourne	Broad	5	11.0	\$502.86	\$45.71	3.4%
car towing service near me	Broad	5	7.5	\$495.81	\$66.11	5.9%
towing pakenham ★	Exact	7	5.0	\$118.30	\$23.66	22.9%
tow truck near me △	Exact	4	4.5	\$241.64	\$53.70	7.6%
towing yarra valley ★	Exact	—	4.0	\$42.15	\$10.54	8.9%
yarra valley towing	Broad	5	3.0	\$59.26	\$19.75	18.8%

KEYWORD	MATCH	QS	CONV	COST	COST / LEAD	CTR
pakenham towing	Broad	5	3.0	\$111.70	\$37.23	30.0%
tow truck melbourne	Broad	7	2.0	\$190.75	\$95.38	5.9%
towing berwick	Exact	7	2.0	\$51.10	\$25.55	33.3%
towing healesville	Exact	5	2.0	\$26.37	\$13.18	28.6%
tow trucks near me ⚠	Exact	1	1.0	\$55.31	\$55.31	4.4%

Below these sits a long tail of cheap, high-intent exact-match town terms each landing a lead — tow truck lilydale (\$19.18), towing lilydale (\$27.34), tow truck croydon (\$59.39), tow truck pakenham (\$83.92).

The star: "towing yarra valley"

Four leads for \$42 — just \$10.54 each, at an 8.9% CTR. The cheapest lead source in the account by a wide margin, and still running on a small share of budget.

Pakenham has become a second stronghold

"towing pakenham" and "pakenham towing" together delivered 8 leads at ~\$29 each, with CTRs of 23% and 30% — the highest engagement in the account. The Pakenham corridor is behaving exactly like the Yarra Valley did.

Suburb terms convert at extraordinary rates

Berwick (33% CTR), Pakenham (30%), Healesville (29%) — when someone searches their own suburb, they're ready to call. These are the terms to expand.

The near-me terms are still the weak link

"tow truck near me" (Quality Score 4) and "tow trucks near me" (Quality Score 1) took \$297 for 5.5 leads. "tow truck near me" has improved a lot since June — from \$149 per lead down to \$53.70 —

but a Quality Score of 1 to 4 means Google is charging a penalty premium on every click. A tighter, more relevant landing page is still the fix.

05 • WINS

The wins 🏆

49 leads — a record month

Up 75% on June and nearly 3× April. Conversions have now grown every single month: 17 → 25 → 28 → 49.

More budget, cheaper leads

Spend rose 43% to \$2,184 while cost per lead *fell* 18% to \$44.58. Scaling usually costs efficiency — here it bought it.

One in three clicks is now an enquiry

Conversion rate hit 33.3%, up from 21.2% in June and 4.4% in April. The traffic reaching the site is the right traffic.

The local strategy is proven

Suburb and Yarra Valley terms produced 23 leads at \$26 each — less than half the cost of broad metro terms. This is a repeatable, expandable play.

Worth watching

Average CPC climbed again — \$11.57 → \$14.86

Third month of increases, up 28% on June. Lead volume is more than covering it for now, but it's the single biggest threat to cost per lead. Driven by competition on the broad metro terms and by the low Quality Scores on the near-me keywords.

~\$174 went to searches that will never convert

Zero-conversion clicks on competitor names (sheen towing bayswater, condello towing, western general towing), off-service queries (race car transporters, motorcycle transport, car transport interstate near me) and junk terms. That's ~8% of the month's spend, recoverable with negative keywords.

Conversion value still isn't tracked

Leads are counted but not valued, so we still can't report revenue or ROAS. An average job value is all we need to unlock dollar-return reporting — this is the one thing holding the reporting back.

Recommended next steps

1

Add the negative keyword list — block competitor names, interstate/vehicle-transport queries and junk terms. Recovers roughly \$174/month straight away.

2

Expand the suburb play — Pakenham, Berwick, Healesville and Lilydale are all converting at \$13–\$27. Build out the neighbouring towns on the same pattern.

3

Fix the near-me landing page — Quality Scores of 1 and 4 are taxing every click on the highest-volume terms. Better page relevance pulls CPC down account-wide.

4

Set a conversion value — so next month's report shows actual return, not just lead count.

5

Decide on the three paused campaigns — two P-Max and one search campaign are still sitting idle.
