Month-on-month breakdown

April's high impressions came from a Performance Max campaign since paused. We tightened the account to focused search — fewer impressions, but the right people clicking and converting.

METRIC	APR	MAY	JUN
Impressions	66,319	12,907	2,045
Clicks	386	339	131
Conversions	17	25	28
CTR	0.58%	2.63%	6.41%
Avg. CPC	\$4.03	\$3.20	\$11.63
Cost	\$1,553.92	\$1,083.59	\$1,522.89
Cost / conversion	\$91.41	\$43.34	\$54.39

Trends & charts

The shape of the story: leads climbing, engagement sharpening, cost per lead well below where we started.

Conversions per month

Leads have grown every month — 17 → 25 → 28.

Click-through rate (%)

Up 11× as we moved budget into focused search.

Cost per conversion (\$)

Down from \$91 to \$54 — best month was May at \$43.

Keywords doing the heavy lifting 🏆

Three keywords drive 55% of all leads. One local term — **towing yarra valley** — is the efficiency standout at just \$23 per lead.

KEYWORD	MATCH	CONV	COST	COST / LEAD	CTR
car towing service near me	Broad	5.5	\$426.55	\$77.55	5.5%
towing service melbourne	Broad	5.0	\$269.29	\$53.86	3.8%
towing yarra valley ★	Exact	5.0	\$115.74	\$23.15	9.6%
tow trucks near me	Exact	2.0	\$64.28	\$32.14	5.3%
tow truck melbourne	Broad	1.0	\$43.52	\$43.52	4.0%
tow truck near me ⚠️	Exact	1.0	\$149.44	\$149.44	7.0%

The remaining leads come from a long tail of cheap, high-intent exact-match local town terms — tow truck pakenham, towing boronia, tow truck belgrave, towing rowville — each landing a lead at \$7–\$62.

The star: "towing yarra valley"

\$23 per lead at a 9.6% CTR — the best keyword in the account. The geographic sweet spot; worth more budget and more town variations around it.

The volume engine

The two broad "near me / melbourne" terms deliver 10.5 of 28 leads — the pricier end, but they're the volume.

The drag on CPC: "tow truck near me"

Spent \$149 for a single lead at Quality Score 4 — the worst value of any keyword. Paired with "tow trucks near me" at Quality Score 1, these low-relevance near-me terms are inflating cost across the board. A tighter, more relevant landing page lifts Quality Score and pulls CPC back down.

05 • WINS

The wins

Conversions up every single month

17 → 25 → 28. That's +65% from April to June, and the strongest month on record.

Click-through rate up 11×

From 0.58% to 6.41%. We cut broad, low-intent traffic and put budget behind tight search — far fewer impressions, but the right people clicking.

Cost per lead down ~40% vs April

\$91 → \$54, with May the standout at just \$43 per conversion.

More results from less noise

June drove 28 conversions off just 2,045 impressions. April needed 66,000 impressions for 17. A far more efficient account.

Worth watching

June CPC jumped to \$11.63

Up from \$3.20 in May — likely increased competition or a bid-strategy shift. It's the one thing pulling cost-per-lead back up. Reining it in gets us under \$40 per lead.

Conversion value isn't tracked yet

Conversions are counted but not valued, so we can't report revenue/ROAS. An average job or lead value unlocks dollar-return reporting.

Recommended next steps

1

Search terms audit — find what's driving the June CPC creep and add negatives to cut waste.

2

Set a conversion value — so next month's report shows actual return, not just lead count.

3

Decide on the paused campaigns — a "Vic Haulage Co New" search campaign and two P-Max campaigns are sitting idle.
